eVAYO Mobile

Interflex App Allows for
Time Management Anywhere
and Anytime

ALLEGION™

eVAYO Mobile Allows for Remote Time Recording

The proliferation of smartphones is steadily increasing and with it the number of devices used for business purposes. To take advantage of this development and to improve our system flexibility and user experience, Interflex has developed an application, which makes processes in the area of time management more convenient and efficient. The eVAYO Mobile app allows for employees, especially field personnel, to record their working times outside the headquarters, independent of time and place.

Mobile Time Management

Work Time Recording Anywhere and Anytime

The eVAYO Mobile app allows for employees to flexibly record their working times from any location. Employees working off-site, e.g. in the field or at construction sites, especially benefit from this application and its functions.

User-Friendly Operation

After successful authentication of their password and user name or personnel number, employees activate functions such as IN, OUT or OFF-SITE via an intuitive graphical user interface on their smartphones.

Autonomous Absence Management

Employees participating in the workflow are able to register or to apply via App for their times of leave. Usage is made easy thanks to a pre-built selection of absence reasons.

Remote Time Management - Quick and Safe

Via an interface between the existing time recording system from Interflex and the accounting system, recorded time data can be transferred to the human resources department to ensure payroll accuracy.

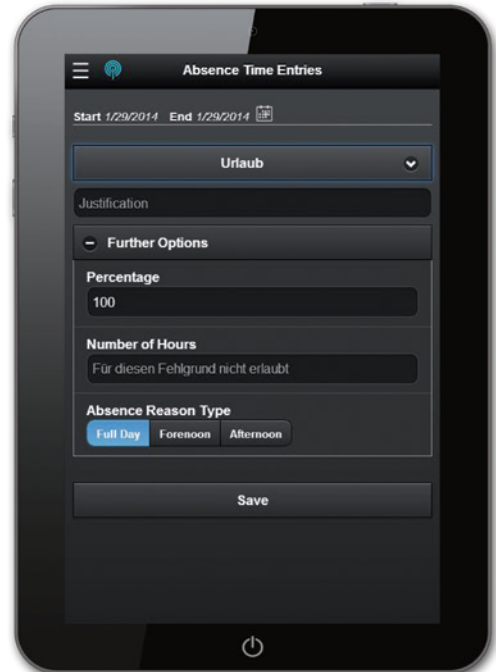

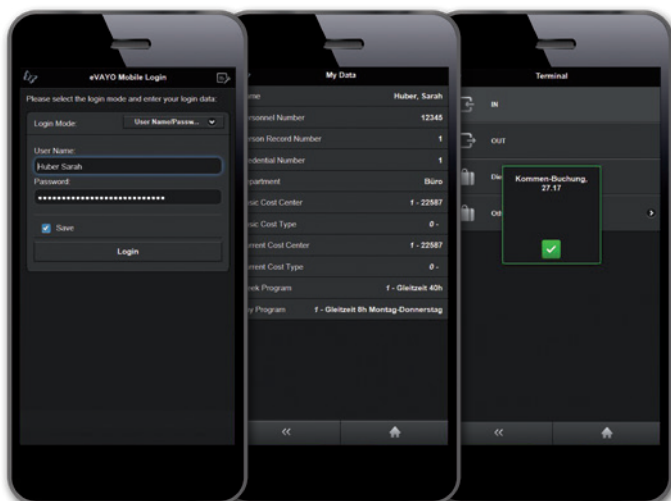

Reliable and Flexible Work Time Recording

As part of the new eVAYO product generation, Interflex adjusted the design and the handling of the application to the new time recording terminal IF-5735 to unify the systems.

Existing terminal functions, such as IN, OUT, Off-Site or Journal, are now also made available to smartphones via eVAYO Mobile and are used in the same way. Access to time recording, however, is different. While performing a work time booking at a terminal requires a credential, performing a booking via app requires a password and a user name or a personnel number for authentication.

Features:

- Reliable functionality
- Easy installation
- Quick and easy integration due to the compatibility with the functions of already existing, stationary Interflex terminals
- Use independent of time and place
- No training required due to easy and intuitive operation
- Thanks to its responsive design the Web-App can be easily operated on mobile devices

Features of eVAYO Mobile:

- End-to-end encryption to protect data transfer/communication
- Retrieval of personal employee base data
- Immediate display of account data (balance, vacation, etc.)
- Available in offline mode if connection to the mobile network cannot be established
- Allocation of user profiles

Your Benefits:

- Autonomous registration and administration of absence times by employees (ESS)
- Precise documentation of time recording bookings anywhere and anytime
- Cost and time savings on administrative processes
- Greater employee satisfaction as a result of increased flexibility and independence
- Innovative and complete transfer of bookings for further processing in payroll accounting
